conservatism, but this is now changing rapidly. The information age has also swept over ships and shipping, and has been taken to heart to such an extent that, for example, flight simulators now cooperate with ship simulators and import useful new concepts and methodologies. The more than 50 papers contained in this

The papers in the book are by leading authors from all over the world and provide a detailed snapshot of the rapidly advancing state-of-the-art, together with pointers to the future.
