This book examines Arab approaches to mediation, negotiation and settlement of political disputes. This book proposes that two clusters of independent variables are potentially responsible for the distinctive nature of Arab conflict resolution. Firstly, those linked with Arab political regimes and imperatives, and secondly those linked with Arab and /or Islamic culture. The text also focuses on the Arab League and its history of involvement in crisis and conflict situations, along with the roles of individual leaders, emissaries and extra-regional actors such as IGOs (Inter-Governmental Organisations) in undertaking mediation initiatives. IGO and Arab League activity has taken on new importance since the various intervention attempts in connection with the 'Arab Spring' since 2011. During the negotiation process, most Arab regimes tend to view conflicts within a broad historical context and Islamic culture prioritises the cohesion of the community and internal stability of the state over individual autonomy. This has created an authoritarian style of leadership, and in practice, leaders in the Middle East have had near absolute authority in the decision-making process—a fact which will have a lot of weight in conflict management and whether peace will endure for a long period of time. This book is unique in studying these clusters through comparative systematic case study analysis of events prior to and subsequent to the 'Arab Spring', augmented by a quantitative analysis of sample data on Arab disputes, compiled from a larger and newly augmented study comprising the years 1945-2000. Complementary data from the Uppsala Conflict Data Program ' s (UCDP) data base of armed conflicts since 1975 is also utilized. This book will be of much interest to students of conflict resolution, peace and conflict studies, Middle Eastern politics and IR in general.

It covers: Historical Legacies; The Ottoman Empire, WWI, colonialism and the Cold War; nationalism and Islamist politics Authoritarianism in Egypt, Algeria and Syria; political changes in Iran; the politics of oil in Saudi Arabia and the Gulf States; Israel, the Palestinians and the Arab States Intervention in Afghanistan and Iraq The recent uprisings in the Arab World, human rights, social movements and social media Each chapter opens with helpful learning objectives and concludes with study questions. This third edition of Conflicts in the Middle East since 1945 analyzes the nature of conflict in the Middle East, with its racial, ethnic, political, cultural, religious and economic factors. Throughout the book Peter Hinchcliffe and Beverley Milton-Edwards put the main conflicts into their wider context, with thematic debates on issues such as the emergence of radical Islam, the resolution of conflicts, diplomacy and peace-making, and the role of the superpowers. The book is brought fully up to date with events in the Middle East, covering, for instance, developments in Iraq in 2006 where a democratically elected government is in place but the insurgency show no sign of coming under control. The analysis of the Palestinian/Israeli conflict is also brought up to the present day, to include the election of the Hamas government and the 2006 conflict between Israel and Lebanon ' s Hizballah. Including a newly updated bibliography and maps of the area, this is the perfect introduction for all students wishing to understand the complex situation in the Middle East, in its historical context.

This new edition of An Introduction to Middle East Politics continues to provide an expansive survey of Middle East politics, thoroughly revised and restructured in response to events currently taking place. Written in a lively and accessible manner, MacQueen takes students on a tour of the region ' s modern political history up to the present, clearly signposting key events and issues. Providing comprehensive coverage of all key themes in Middle East politics, this book covers: Historical Legacies; The Ottoman Empire, WWI, colonialism and the Cold War; nationalism and Islamist politics Authoritarianism in Egypt, Algeria and Syria; political changes in Iran; the politics of oil in Saudi Arabia and the Gulf States; Israel, the Palestinians and the Arab States The Syrian conflict including regional ramifications and particular focus on the Syrian refugee crisis Each chapter includes a timeline, learning objectives, study questions and annotated further reading and the book finishes with a glossary. Contemporary and fascinating, with dedicated material on culture, gender, ethnicity and minorities, this book is a crucial companion for students of Middle East politics.

This study of conflict management in the Middle East covers general conflict resolution in Islam, sociological roots of conflict resolution in the Arab World and conflict resolution and the Arab state. The Western perspectives presented are then critiqued from a non-Western standpoint.

Seminar paper from the year 2010 in the subject Politics - International Politics - Topic: Peace and Conflict Studies, Security, grade: 1.0, East Tennessee State University (History Department), course: Origins of Problems in the Middle East, language: English, abstract: In September 2001, shortly after the terrorist attacks on America, President George W. Bush announced his " Crusade " against terrorism - a Crusade that was aimed mainly at Islamic fundamentalists. One Millennium after the first Crusades, that conflict seemed still going on and the connection to that fateful day in September 2001 was drawn easily. The fight had been going on since the first expansion of Islam into the former Christian world. An everlasting conflict between Christians in the West and Muslims in the East seems so obvious that we take it for self-evident when we perceive our political world. Authors have written and modified it repeatedly. Not long ago, Bernard Lewis wrote his Islam and the West telling us about the history of these cultures as a history of military conflict. One more famous book takes that approach to take a look at the recent development in world politics and predict its Clash of Civilizations. Huntington shows the post-Cold War world by explaining global politics along cultural lines. One of the most important of these lines is, not surprisingly, the one between the Islamic and the Western Civilizations. But what if we take a closer look on what appears to be behind the ambiguous history of Crusades and Holy Wars. Are there perhaps more sophisticated explanations. We have to differentiate the motives for the main campaigns in an assumed " continuous conflict. " Therefore we will see over the Crusades, the fierce war at the front between Christendom and Islam under Ottoman rule and finally the modern antagonisms to verify or falsify that theory of a causally determined cultural conflict.

The question of whether Islam is compatible with democracy may best be answered not from the classical sources or even from the cauldron of Middle East politics but from the lived experiences of Muslim communities around the world. In large and diverse countries, the varied political values of different cultures can make or break the democratic experiment. Regardless of their cultural context, transitions from military to civilian rule require attention to the grassroots civic cultures that form the foundations of democratic federalism. John Paden, a noted expert on West African and Islamic societies, uses Nigeria as a critical case study of how a diverse country with a significant Muslim population is working to make the transition to a democratic society. Although little-studied, the non-Arab Muslim communities of West Africa are an important indicator as to whether Islamic democracy in a diverse nation is possible. Nigeria's success is vital to regional and global stability. As the largest country in Africa, with a population that is about half Muslim and half Christian or traditional animist, Nigeria is also the seventh largest producer of oil in the world and has gone through a series of political traumas ranging from civil war to military rule. The current democratic government is trying to balance rule-of-law concerns at a time when many communal tensions are coming to the surface. Muslim Civic Cultures and Conflict Resolution in Nigeria takes us inside the complex world of Nigerian politics, with a focus on the ways Muslim civic cultures deal with matters of leadership and conflict resolution. The book provides an essential context to the current international concern with issues ranging from Shari'a law and communal violence, to the broader war on terrorism. It argues that the requirement for regional political cooperation serves as a counterbalance to more extreme forms of political expression. Paden shows that if the Nigerian political model of democratic federalism works, then there is a real world, peaceful alternative to the "clash of civilizations" predicted by the intellectual world and threatened by al Qaeda.

Conflict in the Middle East has the potential not only for destabilizing the region or upsetting the balance of power but also affecting global stability. For these reasons, the Middle East has been a center of world affairs. This volume provides an account of international relations in the contemporary Middle East.
