"How are spiritual power and self-transformation cultivated in street ministries? In *Addicted to Christ*, Helena Hansen provides an in-depth

analysis of Pentecostal ministries in Puerto Rico that were founded and managed by self-identified 'ex-addicts.' Richly ethnographic, the book melds Hansen's dual expertise in public anthropology and psychology. Through her interviewees' stories, she examines key elements of the Pentecostal system: mysticism, ascetic practice, and the idea other-worldliness. She then shares the strategies of Pentecostal ministries, which, according to street ministries, are the core elements of spiritual victory over addiction: transformation techniques to build spiritual strength and authority through pain and discipline; cultivation of alternative masculinities based on male converts' reclamation of domestic space; and radical rupture from a post-industrial

Preparation makes a significant contribution to our understanding of how young males of color can best be served in schools throughout the United States today. A founding teacher at Urban Prep, Warren offers a detailed exploration of what this single-sex public high school on the South Side of Chicago has managed to accomplish amid profoundly challenging circumstances. He provides a comprehensive portrait of the school—its leaders, teachers, and professional staff; its students; and the community that the school aims to serve—and highlights how preparation for higher education is central to its mission. Warren focuses on three main goals: to describe Urban Prep ' s plans and efforts to prepare young Black males for college; to understand how race,

community, poverty, and the school contributed, in complex and interrelated ways, to the academic goals of these students; and to offer a wide-ranging set of conclusions about the school environments and conditions that might help young Black males throughout the country succeed in high school and college.

explored only since the advent of psychoanalytic theory. Freud and some of his early disciples recognized the potential of such folklorist genres as myth, folktale, and legend to illuminate the intricate workings of the human psyche. Alan Dundes is a renowned folklorist who has successfully devoted the better part of his career to applying psychoanalytic theory to the materials of folklore. *From Game to War* offers five of his most mature essays on this topic. Dundes begins with a comprehensive survey of the history of psychological studies of folklore in the United States. He then presents a striking analysis of the spectrum of behavior associated with male competitive events ranging from traditional games -- such as soccer and American football -- to

warfare. He argues that all of these activities can be seen as forms of macho battle to determine which individual or team feminizes his or its opponents. This is followed by a study of the saga of William Tell, one of the most celebrated legends in the world. A novel treatment of the biblical flood myth in terms of male pregnancy is the penultimate essay, while the concluding article proposes an ingeniously imaginative interpretation of the underpinnings of anti-Semitism.
